

Results

At UNM Health, we believe you should be able to see your results as soon as they are available.

As the patient, you can choose **when** to view your information. Some test results can be hard to understand, may be unexpected or show a serious disease.

Some patients want to **wait** to discuss results with their provider at their next video, phone or in-person visit. If you have not heard from us within a few days, or if you cannot wait, you may contact your clinic. Your provider will talk to you about what your results or information means.

Some patients want to see results **right away**. When you view results on the portal, keep in mind **you may see results even before your health care provider has seen them**.

If you choose to view your health information in the portal, you can see most of the same data as in your electronic medical record. (By law, we are not allowed to share some information in the portal.)

Click on a lab result to see past results for a test. If you believe any information is incorrect, please call your clinic.

Click the **View More** link for more information.
