To whom it may concern,

I have been the primary care provider for Christy Lewis for over 10 years. I have watched her struggle with the Lipedema of legs and ankles for quite a while. She maintains an excellent diet and exercise routine but to no avail. She had a procedure done on lower legs/ankles past couple of years and has benefitted greatly.

She needs the procedure done on bilateral thighs to enable her to continue her occupation of an ED nurse and active member in our community. This is not a request for cosmetic surgery but for improvement of her life.

I can be reached at Lassen Indian Health, 530-257-2338 or by cell at 530-249-9312 for further information.

Thank you,
